Claims 21-25, 29, 30 and 39-40 are rejected under 35 U.S.C. 102(b) as being anticipated by Dehdashtian et al. (6,013,092). Dehdashtian et al., in figure 2a disclose a balloon 12 in an expanded state wherein the balloon wall has an inner surface facing inward and an outer surface facing outward, and in figure 2f, disclose the balloon 12 in its contacted condition having a central portion (the portion of the balloon 12 which is adjacent to catheter body 10) and a plurality of structures (wherein one structure is at the top right portion of figure 2f and which includes wings 20a'', 20b'' and wherein another structure is at the bottom left portion of figure 2f and which includes wings 20c'', 20d'') extending from the central portion, each structure comprising a base (Each base comprises two portions. For example, the base at the top right portion of figure 2f includes a portion between the left end of wing 20a'' and the central portion and another portion between the right end of wing 20b'' and the central portion.), wherein the base is a double layer of balloon material, a first wing 20b'' or 20d'' wrapped continuously in a first direction (counter clockwise) away from the base (i.e. away from a portion of the base) about the central portion of the balloon to and terminating at a first terminating end (e.g. the left end of 20b'' as seen in figure 2f) and a second wing 20a'' or 20c'' wrapped continuously in a

second direction (clockwise) away from the base (i.e. away from a portion of the base) about the central portion of the balloon to and terminating at a second terminating end (e.g. the right end of 20a'' as seen in figure 2f) as described in col. 5, lines 6-16. As to claim 23, when there are six longitudinal furrows instead of the four shown in the drawings (as described in col. 4, lines 47-56) there are three structures instead of the two shown in the drawings. As to claim 24, Dehdashtian et al. disclose a plurality of T-shaped structures (one T-shaped structure comprising wings 20d'', 20b'' and 20c'' and another T-shaped structure comprising wings 20d'', 20b'' and 20a'' prior to being wrapped about the central portion of the balloon as shown in figure 2e) extending from the central portion of the balloon. As to claim 30, Dehdashtian et al. disclose a plurality of V-shaped structures (one V-shaped structure comprising wings 20a'' and 20b'' and another V-shaped structure comprising wings 20c'' and 20d'' prior to being wrapped about the central portion of the balloon as shown in figure 2e).

Claim 41 is allowed.

Applicant's arguments filed June 7, 2007 have been fully considered but they are not persuasive for the reasons set forth above.
